A00: Irregular Openings
SCHACH 11/1985 Seite 495
Liu Daowei David writes: "Dear John, The Benoni is a nice opening to play. .. but only if you get it! 1 d4 Nf6 2 c4 e6 3 Nf3 c5 4 g3 is an annoying move order, but I was wondering if Black can mix it up with 4...a6!? (intending ... b7-b5). This line was featured in New in Chess Yearbook 62 where Rene Olthof gave the game Haba-Vokac, Czech League 2000/01. I would love to hear your opinion on this. While you're covering the ...a6/...b5 approach, would you also give you opinion on whether this is a universal panacea? By universal I mean it would surely be wonderful if this ...a6/ ...b5 approach could be applied to ALL Reti/English move orders, e.g. 1 Nf3 Nf6 2 c4 e6 3 g3 c5 4 Bg2 a6 5 Nc3 b5!? In this case, I'm not sure if the omission of d4 helps White or Black? When White plays 6 cxb5 Black gets in 6...d5 (or 6... axb5 first and then ...d5) and it's a sort of Benko/Blumenfeld with Black being very strong in the centre. Even the materialistic Fritz doesn't give White more than an advantage of +0.3, which means the compensation is sufficient for humans? I'd like to hear your grandmasterly opinion on this though! Thanks for the wonderful site!" Many thanks for your email! It's true that 1 d4 Nf6 2 c4 e6 3 Nf3 c5 4 g3 (or 4 Nc3) is a bit of a pain for Black. I must admit I didn't realise that against 4 g3 this 4... a6 and ...b7-b5 was possible - I thought Black had to transpose to the English with 4...cxd4. Of course the Reti/ English move orders can also be annoying for Benoni/Benko players. In general I think it's worth Black players learning independent lines against these (for example, 1 c4 e5), but there are one or two offbeat lines involving a quick ... a6 and ...b5. In particular, the enterprising 1 Nf3 Nf6 2 c4 e6 3 g3 a6!? and then ...b7-b5 (Romanishin popularised this) is certainly worth considering and is covered on Tony Kosten's Flank Openings website (ECO code A13 in ChessPub). Your move

order 1 Nf3 Nf6 2 c4 e6 3 g3 c5 4 Bg2 a6 5 Nc3 b5!? is much less common - I only found three examples in Mega Database 2005. That said, in one of these the Czech GM Ftacnik was playing Black and it certainly looks like a reasonable practical gambit. **1.b4 Nf6 2.Bb2 g6 3.Bxf6N**

A00: Irregular Openings
I played this game in a 'First Saturday' tournament in Budapest. The opposition consisted mostly of strong IMs, so I knew it wouldn't be easy. Even though I finished tied for last place, I was very happy to have played some wild games. After a short draw against a GM in the first round, my next opponent was the Hungarian chess coach, IM Janos Szabolcsi. During my preparation for the game, I got pretty nervous because the guy had four good defences against 1 e4. After hours of hard work, the best I could find against them was a very small edge. This was not particularly satisfying, so I figured it was time to trot out 1 b4 for its maiden appearance in this event. After reviewing a few Sokolsky games (this book wasn't available yet!) I was ready... **1.b4 d5 2.Bb2 c6 3.e3 Nf6 4.Nf3 Bg4**

A00: Irregular Openings
This was my final-round game at the Guelph Open. After five draws in a row against GMs and a loss to an IM, I had to beat Stevens. He was a young player and I didn't have many games of his in my database. In this situation, what to play on my first move became obvious.

A00: Irregular Openings
FIGHTING THE BISHOP PAIR. The attacking potential of the bishop pair was illustrated in CVT 51. As a big fan of knights, I'm happy to alter the pawn structure and see what it looks like when the cavalry prevails. This game was played during the Cultural Village tournament, in which I was trying to qualify for the Corus 2007 grandmaster C-group. With a lot of help from my CVT-colleague Robert Ris, I prepared heavily for this game and while waiting for my opponent to arrive I was curious what he'd come up with. However, the amiable French master felt no urge to test our preparation at all. He calmly entered the playing hall, hung up his jacket, shook my hand and played **1.b4 Nf6 2.Bb2 e6 3.a3 Be7 4.Nf3 0-0 5.e3 b6 6.c4 Bb7 7.Be2 d5N**
[7...c5 8.Qb3 Nc6 9.bxc5 bxc5 10.0-0 Rb8 11.Qc2 Na5 12.Nc3 Bxf3 13.gxf3 Ne8 14.f4 f5 15.Kh1 Qb6 16.Rab1 Qc6+ 17.f3 Bf6 18.d3 Nc7 19.Ba1 d5 20.cxd5 exd5 21.e4 d4 22.Na4 0-1 (33) Armas,J (2392)-Willemze,T (2384) Cultural Village 2006 (4)]

A00: Irregular Openings
I played this game in a 'First Saturday' tournament in Budapest. The opposition consisted mostly of strong IMs, so I knew it wouldn't be easy. Even though I finished tied for last place, I was very happy to have played some wild games. After a short draw against a GM in the first round, my next opponent was the Hungarian chess coach, IM Janos Szabolcsi. During my preparation for the game, I got pretty nervous because the guy had four good defences against 1 e4. After hours of hard work, the best I could find against them was a very small edge. This was not particularly satisfying, so I figured it was time to trot out 1 b4 for its maiden appearance in this event. After reviewing a few Sokolsky games (this book wasn't available yet!) I was ready... A00: Ouvertures irrégulières

[Kitty Kat]

A00: Irregular Openings
Liu Daowei David writes: "Dear John, The Benoni is a nice opening to play. .. but only if you get it! 1 d4 Nf6 2 c4 e6 3 Nf3 c5 4 g3 is an annoying move order, but I was wondering if Black can mix it up with 4...a6!? (intending ... b7-b5). This line was featured in New in Chess Yearbook 62 where Rene Olthof gave the game Haba-Vokac, Czech League 2000/01. I would love to hear your opinion on this. While you're covering the ...a6/...b5 approach, would you also give you opinion on whether this is a universal panacea? By universal I mean it would surely be wonderful if this ...a6/ ...b5 approach could be applied to ALL Reti/English move orders, e.g. 1 Nf3 Nf6 2 c4 e6 3 g3 c5 4 Bg2 a6 5 Nc3 b5!? In this case, I'm not sure if the omission of d4 helps White or Black? When White plays 6 cxb5 Black gets in 6...d5 (or 6... axb5 first and then ...d5) and it's a sort of Benko/Blumenfeld with Black being very strong in the centre. Even the materialistic Fritz doesn't give White more than an advantage of +0.3, which means the compensation is sufficient for humans? I'd like to hear your grandmasterly opinion on this though! Thanks for the wonderful site!" Many thanks for your email! It's true that 1 d4 Nf6 2 c4 e6 3 Nf3 c5 4 g3 (or 4 Nc3) is a bit of a pain for Black. I must admit I didn't realise that against 4 g3 this 4... a6 and ...b7-b5 was possible - I thought Black had to transpose to the English

with 4...cxd4. Of course the Reti/English move orders can also be annoying for Benoni/Benko players. In general I think it's worth Black players learning independent lines against these (for example, 1 c4 e5), but there are one or two offbeat lines involving a quick ... a6 and ...b5. In particular, the enterprising 1 Nf3 Nf6 2 c4 e6 3 g3 a6!? and then ...b7-b5 (Romanishin popularised this) is certainly worth considering and is covered on Tony Kosten's Flank Openings website (ECO code A13 in ChessPub). Your move order 1 Nf3 Nf6 2 c4 e6 3 g3 c5 4 Bg2 a6 5 Nc3 b5!? is much less common - I only found three examples in Mega Database 2005. That said, in one of these the Czech GM Ftacnik was playing Black and it certainly looks like a reasonable practical gambit. **1.b4 Nf6 2.Bb2 g6 3.c4 Bg7 4.a4N**

A00: Irregular Openings
Liu Daowei David writes: "Dear John, The Benoni is a nice opening to play. .. but only if you get it! 1 d4 Nf6 2 c4 e6 3 Nf3 c5 4 g3 is an annoying move order, but I was wondering if Black can mix it up with 4...a6!? (intending ... b7-b5). This line was featured in New in Chess Yearbook 62 where Rene Olthof gave the game Haba-Vokac, Czech League 2000/01. I would love to hear your opinion on this. While you're covering the ...a6/...b5 approach, would you also give you opinion on whether this is a universal panacea? By universal I mean it would surely be wonderful if this ...a6/ ...b5 approach could be applied to ALL Reti/English move orders, e.g. 1 Nf3 Nf6 2 c4 e6 3 g3 c5 4 Bg2 a6 5 Nc3 b5!? In this case, I'm not sure if the omission of d4 helps White or Black? When White plays 6 cxb5 Black gets in 6...d5 (or 6... axb5 first and then ...d5) and it's a sort of Benko/Blumenfeld with Black being very strong in the centre. Even the materialistic Fritz doesn't give White more than an advantage of +0.3, which means the compensation is sufficient for humans? I'd like to hear your grandmasterly opinion on this though! Thanks for the wonderful site!" Many thanks for your email! It's true that 1 d4 Nf6 2 c4 e6 3 Nf3 c5 4 g3 (or 4 Nc3) is a bit of a pain for Black. I must admit I didn't realise that against 4 g3 this 4... a6 and ...b7-b5 was possible - I thought Black had to transpose to the English with 4...cxd4. Of course the Reti/ English move orders can also be annoying for Benoni/Benko players. In general I think it's worth Black players learning independent lines against these (for example, 1 c4 e5), but there are one or two offbeat lines involving a quick ... a6 and ...b5. In particular, the enterprising 1 Nf3 Nf6 2 c4 e6 3 g3 a6!? and then ...b7-b5 (Romanishin popularised this) is certainly worth considering and is covered on Tony Kosten's Flank Openings website (ECO code A13 in ChessPub). Your move order 1 Nf3 Nf6 2 c4 e6 3 g3 c5 4 Bg2 a6 5 Nc3 b5!? is much less common - I only found three examples in Mega Database 2005. That said, in one of these the Czech GM Ftacnik was playing

Black and it certainly looks like a reasonable practical gambit. **1.b4 g6 2.Bb2 Nf6 3.c4 Bg7 4.a4N**

A00: Irregular Openings

SCHACH 11/1985 Seite 495

Liu Daowei David writes: "Dear John, The Benoni is a nice opening to play. .. but only if you get it! 1 d4 Nf6 2 c4 e6 3 Nf3 c5 4 g3 is an annoying move order, but I was wondering if Black can mix it up with 4...a6!? (intending ... b7-b5). This line was featured in New in Chess Yearbook 62 where Rene Olthof gave the game Haba-Vokac, Czech League 2000/01. I would love to hear your opinion on this. While you're covering the ...a6/...b5 approach, would you also give you opinion on whether this is a universal panacea? By universal I mean it would surely be wonderful if this ...a6/ ...b5 approach could be applied to ALL Reti/English move orders, e.g. 1 Nf3 Nf6 2 c4 e6 3 g3 c5 4 Bg2 a6 5 Nc3 b5!? In this case, I'm not sure if the omission of d4 helps White or Black? When White plays 6 cxb5 Black gets in 6...d5 (or 6... axb5 first and then ...d5) and it's a sort of Benko/Blumenfeld with Black being very strong in the centre. Even the materialistic Fritz doesn't give White more than an advantage of +0.3, which means the compensation is sufficient for humans? I'd like to hear your grandmasterly opinion on this though! Thanks for the wonderful site!" Many thanks for your email! It's true that 1 d4 Nf6 2 c4 e6 3 Nf3 c5 4 g3 (or 4 Nc3) is a bit of a pain for Black. I must admit I didn't realise that against 4 g3 this 4... a6 and ...b7-b5 was possible - I thought Black had to transpose to the English with 4...cxd4. Of course the Reti/ English move orders can also be annoying for Benoni/Benko players. In general I think it's worth Black players learning independent lines against these (for example, 1 c4 e5), but there are one or two offbeat lines involving a quick ... a6 and ...b5. In particular, the enterprising 1 Nf3 Nf6 2 c4 e6 3 g3 a6!? and then ...b7-b5 (Romanishin popularised this) is certainly worth considering and is covered on Tony Kosten's Flank Openings website (ECO code A13 in ChessPub). Your move order 1 Nf3 Nf6 2 c4 e6 3 g3 c5 4 Bg2 a6 5 Nc3 b5!? is much less common - I only found three examples in Mega Database 2005. That said, in one of these the Czech GM Ftacnik was playing Black and it certainly looks like a reasonable practical gambit. **1.b4 g6 2.Bb2 Nf6 3.b5N**

A00: Irregular Openings
I played this game in a 'First Saturday' tournament in Budapest. The opposition consisted mostly of strong IMs, so I knew it wouldn't be easy. Even though I finished tied for last place, I was very happy to have played some wild games. After a short draw against a GM in the first round, my next opponent was the Hungarian chess coach, IM Janos Szabolcsi. During my preparation for the game, I got pretty nervous because the guy had four good defences against 1 e4. After hours of hard work, the best I could find against them was a very small edge. This was not particularly satisfying, so I figured it was time to trot out 1 b4 for its maiden appearance in this event. After reviewing a few Sokolsky games (this book wasn't available yet!) I was ready... **1.b4 c6 2.a3 a5 3.b5 d5 4.Bb2 Nf6 5.e3 e6 6.Nf3 Bd6 7.c4 0-0 8.Nc3N** The position is equal.

A15: English Opening: 1...Nf6
Andy Martin: 'Undoubtedly you will encounter the King's Indian formation quite often and beware the Black attack against your King. Pure defense on its own is no game, and so the way that White normally handles the King's Indian is to push forward on the queenside as quickly as he can, creating targets and weaknesses there. Hopefully the creation of these targets will be enough to distract Black and tie him down. But there are chances on the Kingside too if Black gets it wrong, which he often does.

E60: King's Indian: Unusual lines and Fianchetto Variation without Nc3
John Emms: 'Liu Daowei David writes: "Dear John, The Benoni is a nice opening to play. .. but only if you get it! 1 d4 Nf6 2 c4 e6 3 Nf3 c5 4 g3 is an annoying move order, but I was wondering if Black can mix it up with 4... a6!? (intending ... b7-b5). This line was featured in New in Chess Yearbook 62 where Rene Olthof gave the game Haba-Vokac, Czech League 2000/01. I would love to hear your opinion on this. While you're covering the ...a6/...b5 approach, would you also give you opinion on whether this is a universal panacea? By universal I mean it would surely be wonderful if this ...a6/...b5 approach could be applied to ALL Reti/English move orders, e.g. 1 Nf3 Nf6 2 c4 e6 3 g3 c5 4 Bg2 a6 5 Nc3 b5!? In this case, I'm not sure if the omission of d4 helps White or Black? When White plays 6 cxb5 Black gets in 6...d5 (or 6...axb5 first and then ...d5) and it's a sort of Benko/Blumenfeld with Black being very strong in the centre. Even the materialistic Fritz doesn't give White more than an advantage of +0.3, which means the compensation is sufficient for humans? I'd like to hear your grandmasterly opinion on this though! Thanks for the wonderful site!" Many thanks for your email! It's true that 1 d4 Nf6 2 c4 e6 3 Nf3 c5 4 g3 (or 4 Nc3) is a bit of a pain for Black. I must admit I didn't realise that against 4 g3 this 4... a6 and ...b7-b5 was possible - I thought Black had to transpose to the English with 4...cxd4. Of course the Reti/English move orders can also be annoying for Benoni/Benko players. In general I think it's worth Black players learning independent lines against these (for example, 1 c4 e5), but there are one or two offbeat lines involving a quick ... a6 and ...b5. In particular, the enterprising 1 Nf3 Nf6 2 c4 e6 3 g3 a6!? and then ...b7-b5 (Romanishin popularised this) is certainly worth considering and is covered on Tony Kosten's Flank Openings website (ECO code A13 in ChessPub). Your move order 1 Nf3 Nf6 2 c4 e6 3 g3 c5 4 Bg2 a6 5 Nc3 b5!? is much less common - I

only found three examples in Mega Database 2005. That said, in one of these the Czech GM Ftacnik was playing Black and it certainly looks like a reasonable practical gambit.' **1.b4 Nf6 2.Bb2 g6 3.Nf3 Bg7 4.c4 0-0 5.e3 d6 6.d4 Nbd7 7.Qb3 c5N**

□ **Sokolsky,Alexey**
■ **Kotov,Alexander**
Leningrad (Game 9) 1938
[Lapshun & Sokolsky,TA]

If the previous games seem too hazardous for you, we offer now three examples of the positional approach – the safe 3 b5 – preferred by Sokolsky himself. Notes in quotation marks are by Sokolsky, translated by Yury Lapshun.
A15: English Opening: 1...Nf6
1.b4 "This game was annotated by Kan in the tournament bulletin under the title 'Irregular Opening'. The move 1 b4 was not taken seriously. Nowadays 1 b4 has earned its 'citizenship' and is a respectable member of the openings family."
1...e5 2.Bb2 d6 "With this move Black assumes the obligations of a big centre and a potential weakness on the a2-g8 diagonal, which White may attempt to exploit directly by playing 3 e4!? Bxb4 4 Bc4, the so-called Gambit Variation. In addition Black's ...f6 does nothing to further his development. White's actual move eschews gambit play, hoping to undermine Black's centre by positional means."
3.c4 Nf6 4.e3 g6 5.Nf3 Bg7 6.Nc3 0-0 7.Be2 -0.54/24
[7.d4! -0.69/21 7.d3 -0.02]
[White should play 7.d3= 0.01/22]
7...e4∓ "Black's pawn centre is clearly both a source of strength and weakness. "
8.Nd4 Black is slightly better. **8...c5 9.Nc2** -0.93/22
